

\$115,150. Subscribed To Victory Loan

THE BASSANO RECORDER

VOLUME SIX NUMBER 34 BASSANO, ALBERTA, THURSDAY NOVEMBER 11, 1943 License number 727154

116 Articles Sent From Red Cross

The Ladies of the Bassano Red Cross have been working regularly in the new Work Room all summer and 920 articles and garments have been shipped to Calgary and 90 to the Super Fluffy Shop. Also 30 cartons of magazines for the Armed Forces. The following shipment of garments was sent away this week:

- 23 Nightgowns
- 3 Small Quilts
- 5 Large Quilts
- 6 Crisp Blankets
- 2 Infant Jackets
- 1 Boy's Suit
- 10 Boy's Pyjamas
- 2 Girls' Coats
- 5 Girls' Nightdresses
- 1 pr. Wool Knickers
- 3 pr. Socks
- 1 Turtle Neck Sweater
- 1 Property Bag
- 7 Bath Cloths
- 18 Babies Garments for the Superfluffy Shop

The Ladies of Makepeace and the War Workers Club of Dorothy have contributed work to the branch. Good supply of wool and sewing material is on hand, which will be supplied to those ladies willing to assist in this worthy cause and help the work of our local branch.

The Natty Nitters Club raffled a Quilt at the Firemans Dance and realized \$36 on the sale of tickets, which sum they kindly donated to the Red Cross for the purchase of material. Mrs. Belcher of Bassano held the lucky ticket on the quilt.

The executive wish to thank the City for this splendid donation to the funds.

Regular weekly work meetings are held on Tuesdays at 2 o'clock, and on Thursday at 8 o'clock. All ladies who can knit or sew are cordially invited to attend.

Firemen's Dance Huge Success

The Bassano Fire Brigade held their annual dance last Friday at the Masonic Hall and it proved to be a very successful occasion. The sum of \$90 was raised from the dance and this will be turned over to the Firemen's Overseas Cigarette Fund. This fund is used to send smokers to the Boys overseas. About 250 people attended the dance and danced to Len Davis and his band until the early hours of the morning. Everyone present expressed the thought that it was a very successful affair. The Firemen wish to express their appreciation to all those who attended the dance and in any way helped make it the success it was.

CADETS ATTEND CHURCH SERVICE

To commemorate the signing of the Armistice in November of 1918 the Bassano Cadet Corps, paraded to the Anglican Church on Sunday November 10th. Rev. S. Evans of Brooks conducted the service and was assisted by the Boys Choir also of Brooks. The Cadets made a very favorable impression in their new uniforms, and also in the manner they conducted themselves on parade. Troop Leader, R. MacLean was in charge of the Cadets and the parade was under the supervision of Lieut. W. Redmond, their instructor.

Fifth Victory Loan Reaches 147 per cent

ITEMS OF LOCAL INTEREST

Miss Jean Wallace was a Calgary visitor last week-end.

Ralph W. Cowan is now a member of the Armed Forces, joining the Army this week in Calgary.

Ft. Lieut. R. H. Harper, D.P.C. Mrs. Harper and son are spending a few days with the former parents, Mr. and Mrs. H. Harper.

Elton Barlow and Bob Stiles were Calgary visitors on Friday of last week.

Mrs. C. Hopkins attended the funeral of Mrs. H. H. H. last Wednesday in Calgary. The late Mrs. H. H. H. was the mother of Mrs. McCrea, former Church minister.

Dick and Dale McPherson both members of his Majesty's Service spent a few days in Bassano.

Mrs. L. Parks is visiting with her mother this week.

Miss A. Hopkins spent the first part of last week in Calgary.

Mr. Ruben Beringer spent last week-end in Bassano.

Oddfellows Hold Sunday Meeting

The local Odd Fellows received a visit on Sunday last from Arthur Young of Edmonton, Grand Master of the Grand Lodge of Alberta, I.O. O.F.W. W. Northover of Calgary, Grand Secretary, and George W. Henderson of Calgary, Grand Treasurer. A very pleasant and profitable time was spent with the members of the Order in the district, when various matters of importance to the Local Lodge were discussed. The evening of the 10th of November at Lodge will meet on Thursday 8 o'clock. All Brothers are requested to be present.

Honey Sale Brings Fine

For selling honey in excess of the ceiling price, Victor Capron, Dreu was fined \$25 and costs. Carl Johnson, Grimsby, purchased sugar without ration coupons and thereby paid a \$10 fine for violating Wartime Prices and Trade Board ration regulations. At Brooks, Albert J. Seaguy, exceeded the 35 mile truck radius and was fined. Possession of loose gasoline coupons cost Cyril Tonnar and Mrs. D. Tonnar of Calgary each a fine of \$25 and costs. These cases were reported during the last week by the regional Enforcement Administration of the Prices Board.

BASSANO EXCEEDS QUOTA BY ALMOST FIFTY PERCENT

After almost three weeks of perfect weather the Fifth Victory Loan has closed. The Bassano Unit went over the top on the fourteenth day and received its first pennant, the 12th unit in Alberta to do so. The total from 114 applications now stands at the sum of \$115,150.00. This amounts to 147 per cent of its quota.

Mr. John Speer, District Organizer of Calgary, Mr. James R. Donaldson, chairman and other members of the local committee wish to thank all the salesmen, who have done such a splendid job in raising such a large sum. "To Speed the Victory", also to the residents of this unit who have taken the opportunity to invest in Gift Militia Securities.

The following is a list of the names of the salesmen selling in this Unit:

Countess Couple Married Last Saturday

On Saturday November 6th a quiet wedding was held at the home of Mr. and Mrs. W. Ferryby when their youngest daughter, Rosemary Elizabeth was given in marriage by her father to Norman John Dalsto of Countess. The bride wore a gold colored two piece dress and a corsage of pink and white roses. She wore a gold heart shaped locket, a gift from the groom. Her sister, Miss Eleanor Ferryby, was bridesmaid and wore a gold dress with brown accessories and a corsage of red roses. The best man was Gordon Ferryby, brother of the bride. Rev. McDannold of Brooks officiated at the ceremony. After the toast was proposed, the wedding supper was served. The brides table was centered with a three-tiered wedding cake under a canopy of pink and white streamers. Mrs. Ferryby chose for her daughter's wedding a green flowered silk dress with a corsage of red roses. The couple left on the evening train for a short honeymoon at Calgary, the bride wearing for travelling a beige suit. Following their honeymoon, the couple will reside at Countess.

Keeping pace with the Dominion's expanding war effort, the Canadian Pacific Railway has established an enviable record in the production of trucks and aerial guns, the transportation of troops and war material, the training of Air Force personnel, and in countless other ways. The pace of tank production at Angus shops, Montreal, has been increasing steadily since the first August-built tank rolled off the assembly line in May 1941. Hundreds have been turned out since. Naval gun production figures at the company's Calgary shops make an equally impressive showing. Today more than 14,000 of the Company's personnel are on Active Service; 1,600 more are in Reserve units or on loan to the Government. Hundreds are attached to C.P.R. units, Red Cross units, public utility, railway groups, and other patriotic enterprises. In Montreal alone, more than 1,000 employees have played themselves as blood donors. The movement of troops, transportation of war material, and the handling of tank units, all activities recently have been carried out with remarkable efficiency, despite the fact that of more than 100,000 Canadian C.P.R. employees, more than 10,000 are in military service. The performance of Canadian Pacific today is a shining example of the company's spirit. These great tasks, under Admirable Chief, are being met and supplied on the move all over the world. Eight C.P. ships have perished in line of duty. Canadian Pacific Air Lines have also "gone active" in co-operation with the British Commonwealth Air Training Plan, the company's airplanes now transport air observers, nurses, etc. elementary flying training school, all on a non-profit basis, and for overhaul and repair plants. Canadian Pacific contributions to Canada's first three Victory Loan drives have totalled \$5,342,500, while monthly employee payroll deductions for War Savings Certificates average \$112,000 a month. The full scope of the Company's war effort is impressively illustrated in the booklet "Canadian Pacific at War," a few cents from which are shown above, and which can be had upon request.

GREETINGS TO ALL OUR READERS

The Bassano Recorder
Member of the C. W. N. A. and the
Alberta Branch of the C. W. N. A.
J. C. PLETT, Owner and Publisher

An Independent Weekly Newspaper
Published every Thursday at the
Recorder Building, Bassano, Alta.

The Bassano Recorder was in its
grave for nine months but now has
erisen again. For the Readers who
like to see and read the Recorder,
it will be a cheery message for them
to see the Recorder in print again.

The Recorder in the past was a
social and business link to the com-
munity and surrounding district and
we hope it will continue to be in the
future. You may through it make
known your needs and wants, and
in return hear of others needs and
wants. You may air your sorrow
and confess your happiness through
its pages. Therefore it will be your
paper.

Your Editor has a motto for his
paper however, it reads: whatever
things are true, whatever things are
honest, whatever things are just,
whatever things are pure, whatever
things are good he will endeavor
to support. By applying this motto
to our writings and you to yours
we will save ourselves any misun-
derstandings.

We will stick to our motto and we
hope you will too.

MUFFING THE FIRST

The United Nations muffed
the first ball when Mussolini
fell. They were not ready for
such a quick turn of affairs. In-
stead of taking advantage of the
confusion and the opportunity
to form a revolution in Italy,
they let the Italians "steer
in their own juice." But instead
of turning out the Fascists and
putting in rulers freely chosen
by the people, the Government
put in Badoglio, who has stas-
ed off long enough to let the
Germans adjust their plans to
the new situation.

That must not happen again.
When the Fascist regime begins
to totter and fall the United
Nations must use every effort
to stir up the common people to
revolt and overthrow the self-
appointed leaders.

The experience in Italy has
certainly taught us a lesson
which we should not be slow to
profit by. We must be prepared,
not only to prosecute the war
with vigor, but to be ready to
meet new situations politically
at opportune times. It is safe
to assume that from now
on plans will be laid, not only
of a military character but on
the civil front as well. If this
is so, then as future dictators

Warn Motorists Of Gas Fumes

Advent of the fall season has
brought in its wake the danger of
carbon monoxide fumes from motor
cars. Already some fatalities from
this cause has been reported.

Officials of the Alberta Motor As-
sociation point out that every car
should be used to avoid the danger
of these dangerous fumes. Now that
many older cars are in operation
on the highways danger of carbon
monoxide have been intensified.

Recently it was reported that
three deaths occurred in one eastern
city when the car occupants were
overcome by gas fumes. In another
that occupants had a narrow escape
from death.

When the car is started in the
garage, make certain that doors and
windows are open and that there
is a free flow of fresh air. Careful
watch should also be kept for the
deadly fumes at other times.

To much extra care cannot be
taken at this time of year, when
there is a tendency to keep the car
and garage doors closed, to avoid
the dangers of carbon monoxide
fumes.

fall, no time will be lost in estab-
lishing governments more in
keeping with the will of the people
and more acceptable to
Democratic Nations.

FOR PEACE TIME USES

The C.C.I.L. and the C.F.A.
have done well to stress at
this time the desirability of
conserving trucks and other
vehicles turned out for our armies
for peace time uses.

It is satisfactory to have as-
surance from the Department of
Munitions and Supply that
reports to the effect that such
equipment will be destroyed
are without foundation.

It is to be hoped that the
Dominion Government has taken
some steps already to en-
sure that there shall be a proper
disposal of war materials
when the war is over. The re-
quest that agriculture co-opera-
tives be given the opportunity
to assist in distributing them
is reasonable, one. Much
of it, no doubt will prove
useful in agricultural, produc-
tion, and the co-operatives are
in a position to do very effective
work in getting it into the
hands of producers who can use

GUN REGISTRATION NEEDED FOR SHELLS

Raiden officials remind that per-
sons applying for small arms am-
munition to local Station Boards
must take their gun registration
with them.

There are also two types of trap-
pers entitled to obtain ammunition,
the first licensed trappers, who
make their living by trapping do
not need to apply to the Local
Station Board, but simply show
their green certificate of essential-
ity, form RH 283, to the retailer.
Holders of limited trapping li-
censes must apply to Local Station
Boards for approval to obtain am-
munition.

For those who miss their steel
wood pads, here's a tip. Sandpaper
is good for removing portions of food
that have boiled over and burned
to the oven and pans.

Alfalfa Will Grow In Any Climate

Where the climatic conditions
are favorable alfalfa thrives on
soils varying in texture from sand
and gravel to heavy compact clays,
although the best soil is a deep
porous loam. It will not do well
on poorly drained land or on soil
that is notably high in acid, states
John Armstrong, Division of For-
age Crops, Central Experimental
Farm, Ottawa. These limitations
can be overcome to a certain ex-
tent by choosing the better drain-
ed land on the farm and by reduc-
ing soil acidity with applications of
lime. Although in common with
other legumes alfalfa can obtain
its nitrogen supply from the air by
the action of nitrogen fixing bac-
teria in the root nodules, it does re-

quire an ample supply of mineral
nutrients such as lime phosphorus,
potassium and sulphur in order to
produce high yields.

With the winter hardy varieties
now available alfalfa may be raised
practically every mixed farming
district in Canada. This long
branching tap root of the plant af-
fords it considerable resistance to
drought. It is true that in extreme-
ly dry areas while it may sur-
vive its productivity is reduced.
Nevertheless, this has been demon-
strated that in these areas where
the run off waters can be conserva-
ed by dams and used for irrigation,
the growing of alfalfa provides the
best possible insurance against a
feed shortage.

First Women Blood Donors at C.P.R. Clinic

MARKING the first time women
had given blood for the Cana-
dian Red Cross Society in an
industrial clinic in Quebec, these
office workers in the Angus Shops
of the Canadian Pacific Railway in
Montreal joined 450 men who had
gone before them to blood donors
in the clinic which has been in
operation at the shops since
July of 1942. The women, part of
a group of 27 who have registered
for blood donations from the big
shops' total feminine personnel of
144, made their appearance in
the Angus medical centre at the

weekly clinic on February 4. The
clinic, first to be operated by an
industrial enterprise in Quebec
and first to be operated by a rail-
way in all of Canada, has resulted
in 1,154 donations to supply the
blood bank shipped overseas for
civilian and military transfusions.
An honor roll posted in Angus
Shops bears the names of those
who have made three donations,
with 100 being in that class now
while one, Malcolm Myatt, a sche-
dule man, has given blood six
times.

HONOURABLE C. D. HOWE, Minister

Thrifty BUILDS TANKS

Never before has individual thrift been so vital a factor in our
country's history. Every dollar we can save counts in the conduct
of this war.

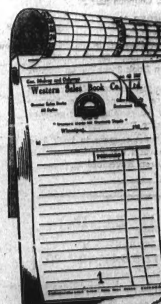

To overtake the enemy and hasten a victorious peace the
Empire must have a modern, smooth running, hard hitting, fighting
machine. But such a machine cannot be built without individual
sacrifice—self denial—thrift.

Until this war is won make
personal thrift your watchword.
Watch your spending. Build up
a reserve of fighting dollars out
of current earnings. Save for
victory.

NEW LEAF-RUST RESISTANT
WHEATS

Owing to publicity from the University of Minnesota regarding a new strain of wheat that is resistant to leaf rust, there has been a great demand for further information. Actually, there are several strains, the best of which has yet to be selected. They have been developed by successive "back-crosses" of Thatcher x Hope hybrids to Thatcher. The aim was to transfer the leaf rust resistance of Thatcher to Hope and have every reason to believe that the efforts of the Minnesota plant breeders have met with a large measure of success. They are about to begin increasing one of the new back-crossed strains.

The strain which will probably be increased has not been tested in Canada, but two others of the group were in variety tests in Western Canada in 1942. They gave higher yields than Thatcher in districts where leaf rust was abundant; but, in the absence of this disease they yielded somewhat less than Thatcher. Under leaf-rust conditions, they yielded better than did Regent and some new selections from crosses between Regent and Thatcher bred at the Dominion Rust Research Laboratory, and now under test.

Seed of the new Minnesota strains will not be available for at least one, and probably two years. In the meantime, leaf rust damage, farmers should grow Regent, or Regent, and make sure they use seed derived from registered strains. Both Regent and Regent have been greatly improved by selection since first distributed. Every farmer growing these varieties would do well to get a start with registered stock—contributed by Dr. C. H. Goulden, Senior Agricultural Scientist, Dominion Rust Research Laboratory.

WHAT HITLER HAS COST

Rough calculations, concern

Clean Storage Needed For Fruits and Vegetables

Much of the damage caused to fruits and vegetables by rotting can be controlled by comparatively simple measures of cleanliness and sanitation, says W. R. Phillips, Division of Horticulture, Central Experimental Farm, Ottawa, who has made a study of the subject.

The chief cause of this damage is mould or fungus growth. These organisms live and thrive on the structural part of the fruiting as well as invading the fruits and vegetables. Musty odors are frequently developed which may taint any unprotected foodstuff in the storage. The greatest aids to the growth of these fungi are moisture and the presence of damaged or senile fruits and vegetables.

If damage is to be prevented the initial step is thoroughly to clean the storage room immediately after the storage season has terminated. Next see that the storage is dry and well ventilated when not in use. The use of a stove or heating device may even be necessary at this time. Generous applications of lime will also assist in drying the storage as well as absorbing any musty odors which may be present.

If fungus growth continues, applications of a fungicide may be necessary. Care must be taken in selecting a fungicide to see that no harm will be done to the building or products stored in the building at a later date. Such a compound as formaldehyde kills the fungi but the residual odors may damage or taint the fruits or vegetables. This may be particularly true on earth floors where the fungicide penetrates the soil and cannot adequately be washed away. Another precaution is to avoid the use of corrosive substances which may damage wood, concrete or metal surfaces.

There are many good fungicides offered for sale which are efficient and harmless when applied. They should be used according to the directions. The main considerations in choosing a fungicide is to make sure it is efficient, non-corrosive and will not taint or injure the fruits and vegetables in storage.

fig the cost of the war given in an American economist, Dr. Leon S. Wellstone, were recently summarized by the Winnipeg Free Press as follows:

"The equivalent of the money spent in ridding the world of Hitler, including all the war damage, would buy every family in this world a \$5,000 home-

RHUBARB CAN BE GROWN IN WINTER

Fresh, pink, juicy, home-ford rhubarb can be had during the winter months until almost the time when the outdoor crop is available in May, says F. P. Ritchie, Division of Horticulture, Central Experimental Farm, Ottawa.

Healthy, two or three old crown or roots sown from good stock produced by divisions are the best, but in some cases, older material is quite good.

The crowns or roots should be dug or ploughed out in the late autumn and left on the surface of ground to freeze. The freezing, coupled with a short rest period, is essential to satisfactory forcing do not force well, due to the natural characteristics of the plant. While on the surface of the ground a light covering of snow will then be spread over them to prevent drying out.

Any frost-proof, dark cellar or shed where the temperature can be maintained at 60 degrees will give root results. Heat can be supplied by the stoves any other convenient system. At a temperature of 50 degrees the growth will be very slow but the color of the product very deep red.

At a temperature above 65 degrees the colour will be pale with slender growth. As it requires about one month from the time the roots are brought in until the first pulling is made, it is necessary to bring in a fresh lot at intervals of two weeks to maintain a continuous supply of forced rhubarb. The usual practice is to make only four pullings from each lot after which they are put of doors to freeze under a light covering of straw litter. These plants can be planted out again in good soil to recuperate.

Because the fleshy roots have all the necessary plant food stored up in them, it is only necessary to place them close together on the forcing cellar floor and spread a light covering of sand, soil or cinders over them as a moisture retaining media. From time to time water should be sprinkled as required to maintain an even moisture supply. The varieties useful for forcing include Ruby, Sutton, and Victoria.

It would provide a four-year college education for 500,000 young men and women. It would build a million dollar hospital for every community of 2,000 or more people the world over. It would pay for the common school education of 400,000,000 children for 25 years. It would build 25,000,000 miles of four-lane cement highways.

In any such calculations the margins for error must be very large; but if the estimates were to be discounted to the extent of fifty per cent, they would remain prophetic of what man may accomplish if he can free the world from the threat of war by removing its causes.

Don't you CAN SERVE BY SAVING!

Household Hints

A new use for broken zippers has been brought to our attention. They can be made into a very serviceable pot and pan cleaners. The zippers are souped together, and for end. They are then sown round and ground in central fashion, forming an easily kept clean utensil.

Another thrifty hint is for the use of dish towels. They are made up in the centre. The towels are sown together and the quilted. They will wear for months longer if they are treated in this way.

One person discovered recently a substitute for tart tins. Metal fruit jar rings were placed on a baking sheet and were then lined with pastry. Tart shells resulted after the pastry was baked. The pastry was cut slightly larger than the rings, then pressed into them.

For dipping fish when eggs are expensive, try using unsifted custard powder for dipping fish for frying.

A Recipe For Today

ORANGE DROP COOKIES

Temperature: 350 deg. F

Time: eight minutes

1/2 cup brown sugar,
6 teaspoons shortening,
1 egg well beaten,
1/2 cup of orange juice
1/4 cups pastry flour
1/4 teaspoon baking soda
1/4 teaspoon baking powder
Cream together the sugar and shortening. Add the well-beaten egg and beat until fluffy. Add the orange juice and juice. Add the sifted dry ingredients and blend. Chill the batter. Drop by spoonfuls on an oiled cookie sheet about two inches apart. Bake in a moderate oven till done. This makes about 20 cookies. The recipe can be doubled and the batter stored in the refrigerator till needed.

Government Subsidies On Coarse Grains Available To Western Grain Growers

As announced by the Dominion Government the subsidy of 10c per bushel on oats and 15c per bushel on barley applies on oats and barley sold by any western farmer to a farmer or feed dealer east of Ft. William—Port Arthur. Special application must be made to the Canadian Wheat Board, Winnipeg, in order to secure the payment. Special forms for this purpose will be provided for this purpose by the Canadian Wheat Board on request. The subsidies will also be paid on community sales between farmer and farmer in western Canada, provided the farmer delivers the grain over an elevator scale and meets the requirements of the Wheat Board.

MAIN DRIVING WHEELS OF CANADA'S WAR EFFORT

HURRYING wheels, thundering wheels. Wheels that have made it possible for Canada to grow in strength.

Today those wheels—the driving wheels of Canada's railways—are setting the pace for the war effort. They haul raw materials to humming war industries and rush away the finished tools of battle. They move food and fuel for the home front and the fighting front. They speed civilians on essential business, hasten troops to camps, embarkation points and on leave.

It's Canada's big war job. A job that only railway wheels can do. A job in which an army of 150,000

railway workers, men and women, is in the fight for Canada... shop crews and train crews, yard workers, section hands, telegraphers, signal men and office workers, a multitude of men and women in a multitude of jobs. They are making the giant wheels turn faster and faster.

From coast to coast in Canada, we—our railways—are rolling in the service of freedom, and our lines to and in the United States have linked the war efforts of two great sister nations.

The railway wheels are driving, in war as in peace, for Canada.

Most Of Us Don't Know

HARDLY ANYONE—NOT EVEN THE PUBLISHER—KNOWS HOW IMPORTANT A NEWSPAPER IS TO A COMMUNITY.

THE SMALLER THE VILLAGE, THE MORE IMPORTANT THE NEWSPAPER IS IN ITS ECONOMIC LIFE. ITS NEWS, EDITORIALS, AND FEATURE STORIES FOCUS THE INTEREST OF SURROUNDING TERRITORY ON THE VILLAGE IN WHICH THE PAPER IS PUBLISHED.

THIS FORCE AND THE FORCE OF ADVERTISEMENTS BY LOCAL MERCHANTS BUILD AN EVER-WIDENING TRADE AREA. THIS MEANS MORE BUSINESS, A BIGGER MAIN STREET, MORE MONEY FOR SCHOOLS, CHURCHES, AND HOMES—A BIGGER AND BETTER VILLAGE. A VILLAGE WITH A NEWSPAPER IS A VILLAGE WITH A FUTURE, THE BETTER THE PAPER, THE BRIGHTER THE FUTURE.

WE ARE TRYING TO MAKE THIS NEWSPAPER THE BEST POSSIBLE. YOUR HELP AND SUGGESTIONS ARE ALWAYS APPRECIATED.

The Bassano Recorder

YOUR NEWSPAPER IS MORE THAN A BUSINESS—IT IS
A COMMUNITY INSTITUTION

HUNTING

By FARMER BROWN

City folks seem to get a great kick spending \$75 or more for a huntin' outfit and going out and gettin' rheumatiz, shooting a pheasant or a duck that ain't near as good or as fat as a nice chicken after they get it.

That's all right with me, or would be if they'd do their hunting in their own back yards. But they expect us farmers to furnish the land to hunt on, and a good deal of the time they don't even ask if it's O.K.

Even the farmers wouldn't be so bad if they were farm broke. But there's one funny thing about city hunters. They're good gate openers but most of them don't know how to shut a gate. After his hunting season opens it takes most of my time to see livestock and gittin' them to go back where they belong.

Some of them hunters ain't very

good marksmen, either, and it didn't improve the bull nose to have a couple of shots in his left eye. I wonder what some of them fellers would do if us farmers would come to town with our guns and started tryin' to scare up a rabbit in their flowerbeds? I doubt if it would work so well, on account once when he was in the city park and my boy Johnny started fishin' the lagoon it cost me \$5 to keep him from going to jail.

In the study of the history of the apple maggot, it has been found that cultivation tends to increase the number of adults which emerge from the soil. Frequent rains during the emergence period have a like result, and also tend to prolong the life and activity of the adult.

Russian General Praises Canadian Tanks

VALENTINE tanks, produced at the Canadian Pacific Railway's Angus Shops in Montreal, have been called by the Russians the best imported tanks they used in crushing Hitler's armor. Major General L. A. Givens, chairman of the Soviet Government Purchasing Commission in the United States, has been quoted by Hon. C. D. Howe, Minister of Munitions and Supply in Ottawa, as

saying "the Canadian tanks Valentine VII have shown good results in combat. The Valentine is one of the best imported tanks." The Soviet general's praise was in response to a request from Mr. Howe for a report on the Valentine's part in the Russian offensive. It preceded a congratulatory message sent by General Givens to H. H. Bowen, chief of motive power

and rolling stock for the Canadian Pacific Railway, on the completion of the Valentine contract early in May, with the news of a global war having dictated a switch to other weapons. At this time, J. H. Berry, Canadian director general of tank production, also congratulated Mr. Bowen and Canadian Pacific personnel "for having delivered the goods on time."

When a farmer purchases a cow he is, in effect, gambling that one animal against his entire herd, save veterinary authorities, unless before being placed with the other animals the cow has been tested by a veterinarian to ensure that it is not a disease carrier.
